

**Wayne Community College  
Program Review – 2021-2022**

**Name of Program:** Agribusiness Technology

**Section 1: Program Overview**

**Mission/Purpose:** *As part of the review cycle, programs are asked to formally evaluate their mission/purpose statement.*

**Please provide your current mission/purpose statement.**

The purpose of the Agribusiness Technology Program is to prepare individuals in sustainable agriculture practices by providing the entrepreneurial and technical skills necessary to manage a profitable, environmentally sound, community based small farm or agricultural business.

**Are you planning to revise your mission/purpose statement? If so, please provide your revised mission/purpose statement and reason for the change.**

No, I am satisfied with the current mission statement.

**Describe how the program's mission aligns with the College's vision, mission, core values, and strategic goals. Identify which Institutional Goal(s) best align with your program and explain why.**

**Goal 1: Increase Student Access**

**Goal 2: Ensure Program Excellence**

**Goal 3: Improve Student Success**

**Goal 4: Ensure Institutional Quality**

The Agribusiness Technology program strives to be the preferred choice for training in the field of agriculture (Goal 1). The program provides essential training in the principles of agribusiness management. Instructors are in constant communication with students and encourage career success (Goal 3). Students are taught valuable leadership skills through lab settings and are encouraged to give back to the community in which they live. This is modeled through our on-campus garden and greenhouses. Each student possesses unique skills, and they are encouraged to work together and learn from each other. The Agribusiness Technology Advisory Committee consists of employers, recent graduates, and community agribusiness leaders. This group is instrumental in guiding faculty in providing relevant skills and the use of technology. Our graduates are expected to be top candidates for job placement or qualify to a baccalaureate program at colleges and universities that have signed articulation agreements (Goals 2 & 3).

**Associates, Diplomas, Certificates, and Pathways Offered:** Please list all associates, diplomas, certificates, and pathways offered in the table below.

Program Type (Associate, Diploma, Certificate, or Pathway)	Program Title
Certificate	C15100 Agribusiness Technology Certificate
Associate	A15100 Agribusiness Technology Degree

**Activities to ensure program is current (2019-20; 2020-21; 2021-22 – Academic Year, Fall, Spring, Summer)**

List program curriculum changes, revisions, and/or deletions.

Curriculum Changes	Date – Updated / Revised / Deleted
Changed “Professional Elective” in the 4 <sup>th</sup> semester from 3-4 to 2-4 and the total credit hours of the AAS from 65-69 to 64-69.	Summer 2021

**Provide an overview of the significance of the program changes and improvements that occurred over the past three years.** (What were the program’s / discipline’s goals and rationale for expanding and improving student learning, including new courses, program degrees, certificates, diplomas, and/or delivery methods?)

With the previous addition of AGR 192, which is a two-hour credit course, Agribusiness students were choosing to take the course along with AGR 111, also a two-hour credit course, leaving them one hour short for graduation.

**Advisory Committee: dates, summary of minutes, activities (2019-20; 2020-21; 2021-22 – Academic Year – Fall, Spring, Summer)**

#### Summary of Advisory Committee Activities

Year	Meeting Dates	Recommendations / Activities
2019-2020	11/22/2019; Spring 2020 canceled due to COVID	Programs were reviewed, student career opportunities discussed, green machine was toured and increased indoor lab space was requested by the committee.
2020-2021	11/20/2020 via zoom; 6/2/2021 via email	Programs were reviewed, no suggestion for changes. COVID schedules were shared and information was shared about the new greenhouse and how the students were embracing the opportunity to have a specific place to plan and grow crops in this space.
2021-2022	12/01/2021 via email	An update on the partnership between Agriculture Extension, NCSU and WCC Agriculture was given. COVID schedules were discussed and recruiting issues due to COVID. Curriculum changes were discussed creating more momentum for students to complete their education. Plans were made to remove courses and add new courses to strengthen the finance skills of graduates.

(Ensure that Advisory Committee Meeting Minutes are filed in the IE Shared Program Folder.)

**Provide narrative for analysis of trends in the field or industry (emerging needs) that contribute to maintaining program relevance.** *(Based on advisory committee suggestions, environmental scans, industry demands, and other sources external to the program/discipline, how well is the program/discipline responding to the current and emerging needs of the industry and/or community? What resources might your program need?)*

The emerging need for the Agriculture Industry is to find capable and willing employees. I have met with employers to discuss their needs and have transferred this information to our current students. We will work together with stakeholders in the field to recruit students that will transition to the workforce they need.

**Section 2: Program Outcomes****Outcome #1: Enrollment (unduplicated)**

**Baseline:** 34 # (Average of total enrollment for the last three years – 2018-19; 2019-20; 2020-21)  
**Standard:** 36 #  
**Target:** 38 #

**Program Enrollment**

Program Enrollment (unduplicated)	
Academic Year (Fall, Spring, Summer)	Enrollment
2018-2019	35
2019-2020	28
2020-2021	40

**Provide narrative for analysis of program enrollment.** *(Is enrollment increasing or decreasing? What are possible reasons for increase/decrease? Describe any action plans to improve or increase program enrollment.)*

Enrollment has increased. I have found over the past 15 years that enrollment cycles up and down. I have tried to discover reasons for increases and decreases and there really is no logical explanation. We work hard every year to get the word out about our program. We attend recruiting events, FFA functions, local high schools and career fairs. Most of the students that I polled said that they found out about our program from the internet or from a friend or family member who graduated from the program.

The disaggregated data indicates that the students are predominantly male Caucasian, between the ages of 18-24.

**Identify Enrollment Action Items**

<b>Item</b>	<b>Action Items</b> <i>(What actions can be taken to increase enrollment in your program?)</i>	<b>Assessment of Action Items</b> <i>(How will you assess the results of action items?)</i>
1	Increase our social media presence by posting weekly on Facebook.	Results will be measured by insights and interactions of posts on Facebook.

**Outcome #2: Retention****Baseline:** 66.7 % (Average of last three years – 2018-19; 2019-20; 2020-21; program retention)**Standard:** 68 %**Target:** 70 %

Year	Program Retention Rate

**Provide narrative for analysis of completers.** *(Based on the data, provide a narrative of your analysis of completions. Indicate factors that may have affected your completions. How might you increase the number of completers in your program?)*

The number of completers fell during the COVID pandemic. An increase has already been seen and should improve once enrollment improves.

The disaggregated data indicates that the students are predominantly male Caucasian, between the ages of 18-24.

**Identify Completer Action Items**

<b>Item</b>	<b>Action Items</b> <i>(What actions can be taken to increase student completion in your program?)</i>	<b>Assessment of Action Items</b> <i>(How will you assess the results of action items?)</i>
1	Active advising.	Students will be advised when they are nearing completion of a certificate or AAS degree. Each student can view their progress on Self-Service and are also given a paper copy to verify and follow.

### Section 3: Other Assessments

Do you use other methods of assessment to evaluate the effectiveness of your program, to include surveys, self-assessments, student licensure/certification, or third-party credentials?. If so, please explain how information collected from the(se) assessments can be used to improve the program.)

No third-party credentials or other assessments.

#### Planning Objectives (2019-20; 2020-21; 2021-22 – Fiscal Year, July 1-June 30)

Provide a summary of planning objectives submitted for the last three years, including the use of results of the planning objectives in the table provided.

#### Summary of Planning Objectives

Planning Year (Fiscal Year – July 1-June 30)	Objective(s) Submitted	Use of Results
2019-20	Frontier 8ft. 3-point disk harrow with 20 blades on 9in. Spacing and a Integral Middle Buster and Mold board plow	Carried forward to 2020-21 Plan to report assessment.
2020-21	<ol style="list-style-type: none"> <li>1) Agribusiness / Sustainable Agriculture - Upfit of "Green Machine" box 2</li> <li>2) Frontier 8ft. 3-point disk harrow with 20 blades on 9in. Spacing and a Integral Middle Buster and Mold board plow</li> </ol>	<ol style="list-style-type: none"> <li>1) <u>2020-21 End-of-Year Status</u>: The green machine has been upfitted and power installed. The two bay mini-system has also been installed. We will begin using this during the summer. We are looking forward to training new students on this new technology. The success of this outcome will be better reflected once students have a chance to use the new green machine. The work study students will get exposure to it this summer to work out any problems and our classes will begin using it Fall of 2021. Carry forward to the 2021-22 plan to report assessment. <u>2021-22 End-of-Year Status and Use of Results Assessment</u>: Students have been able to use the new system. We have found that we have minimal mildew and mold issues. Students have been trained on the new system and have learned to safely produce lettuce and greens in a hydroponic micro-environment.</li> <li>2) <u>2020-21 End-of-Year Status Report</u>: We have not had the opportunity to use this disk because the land is now being used in partnership with agriculture extension. They have access to a local farmer's tractor and implements. We plan on using it this fall to train students to use the disk pulled by our maintenance tractor. Continue to carry forward for 2021-22 for assessment. <u>2021-22 End-of-Year Status Report and Use of Results</u></li> </ol>

		<p><u>Assessment:</u> The land is now being used in cooperation with Wayne County Extension. Equipment is being borrowed from a local farmer. The tractor we have will not pull the implement and this is why the disk harrow is no longer needed. The College is able to use a local farmers equipment since the implement will not work on our tractor.</p>
2021-22	Agriculture and Natural Resources - Half-Box Hydroponic System	Just installed and will be used this summer to test work study students. Carry forward to 2022-23 Plan to report assessment.

**What planning objectives (equipment, supplies, software, etc.) do you anticipate needing over the next three years? Justify the need.**

I submitted a planning objective for a Toro dump side-by-side. This would help students haul off garden waste more efficiently. We are currently using a JD Gator that was written off 6 years ago as unrepairable. We fixed it and have been using it but it has a manual dump bed that is broken.

**What positions (faculty and/or staff) do you anticipate needing over the next three years? Justify the need.**

I would like to see steady and consistent growth in student numbers before adding an additional faculty member.

**Provide narrative for your program facility needs over the next three years. If facilities are adequate, please confirm.**

There is a need for a building on campus to hold indoor lab sections closer to outdoor facilities. We are also losing our storage space in Azalea and are in need of additional climate-controlled storage. This building would also be an excellent recruiting tool to showcase our program.

**Provide narrative for academic / student support services needs over the next three years. (Are services adequate for your program/service?)**

Academic and student support services are adequate.

**Provide narrative for analysis of the program's / discipline's strengths, weaknesses, and opportunities.**

Applied Agribusiness Technology's strengths are: 1) Broad topics are covered that apply to many different aspects of the Agriculture Industry, 2) Advising and relationships built between students and advisors, 3) Reputation of the program and work force it has created over the years.

Weaknesses include: 1) All of my students are working at least a part time job while taking classes. This makes retention and success more challenging. It also makes the number of classes students can commit to lower than they could be.
