RESEARCH CENTER[™]

Institutional Persistence and Retention Report

Fall 2014 to 2019 Entering Cohorts

WAYNE COMMUNITY COLLEGE

School and Branch Code: 002980-00

NATIONAL STUDENT CLEARINGHOUSE RESEARCH CENTER

2300 Dulles Station Blvd., Suite 220, Herndon, VA 20171

About Your Institution's Persistence and Retention Report

The purpose of this report is to provide you with a view of student retention and persistence rates for your institution. This report is exclusively for your institution's use. The Clearinghouse will not publish or distribute your institution's results.

Data Source

The data for this report were drawn from the Clearinghouse's national coverage of enrollment and awarded education credentials to explore the year-to-year persistence and retention rates of cohorts of first-time-in-college students who started in the fall terms of 2014 to 2019.

The student outcomes captured in this report are based on student-level data representing an unduplicated headcount of students across all institutions, a feature of the Clearinghouse data sets that distinguishes them from many other data sources, including the Integrated Postsecondary Education Data System (IPEDS), that may not accurately capture the complexity of postsecondary pathways because they are not structured to identify multiple enrollments by individual students. The capability of StudentTracker to link enrollment records across institutions nationally allows researchers to follow students longitudinally as they move from institution to institution, producing a fuller picture of college persistence and completion.

The Definitions and Methodology section at the end addresses cohort selection and terminology. Additional questions or feedback can be sent to nscresearch@studentclearinghouse.org.

National Benchmarks

If you would like to see the latest Persistence and Retention snapshot, published by the National Student Clearinghouse Research Center, please visit: [NSC Research Center reports](#)

Changes to the 2021 report

The 2021 national report updated the longitudinal view with the 2019 cohort. It also included data enhancements, noted below, designed to identify the first-time beginning student cohort more accurately.

- Removal of graduate level enrollments as identified by program enrollment data that became available in 2014.
- Removal of **current** dual enrollees, who take college courses while in high school

Historical data for the 2014-2018 cohorts has been revised to reflect these enhancements and your cohort counts may be reduced as a result. A complete description of the national report methodology and cohort definition can be found here:

Definitions and Methodology

Fall Enrollment

A student is counted as having been enrolled in the fall if they were enrolled for any length of time in a term that began between August 1 and October 31, inclusive.

Retention

Defined in this report as continued enrollment (or degree completion) within the same higher education institution in the fall semesters of a student's first and second year.

Persistence

Defined in this report as continued enrollment (or degree completion) at any higher education institution - including one different from the institution of initial enrollment - in the fall semesters of a student's first and second year.

Starting Enrollment Intensity

A student is classified as having started college in a full-time or part-time status based on their earliest reported enrollment intensity within the entering fall term. The part-time group comprises three-quarter-time, half-time and less-than-half-time students. Students enrolled in a non-credential program or whose program level (certificate, associate, or bachelor's degrees) was unreported are not included in the full-time and part-time categories. Therefore, the sum of full-time and part-time students may not match the overall cohort count. Non-credential programs include preparatory coursework, teacher certification, or other non-credit career and technical education (CTE) programs that may lead to an industry certification if the student takes the certification exam. Program Unknown reflects students with an unreported program level. The circumstances behind the lack of program information are institution-specific and can range from first-time students who are required to be undeclared until they declare a specific major, to non-degree students.

First-Time Status

This report uses historical Clearinghouse enrollment and degree data to confirm that students included in the study (1) showed no previous college enrollment in the four years prior to the entering cohort year and (2) had not previously completed a college degree. In order to reliably identify students with prior enrollments, this report is limited to institutions that began submitting enrollment data to the Clearinghouse for terms beginning on or before June 1st of the year that is four years before the earliest eligible cohort.

Degree-Seeking Status

The retention rates reported by IPEDS are limited to degree-seeking students. This report differs in that it includes all entering students, including non-degree-seeking students, for the 2014 cohort. Beginning with the 2015 cohort, non-degree-seeking students were reported in a separate category and are not included in this report.

Former Dual Enrollment Students

The cohorts used in this study include former dual enrollment students: first-time college students who had taken college courses prior to graduating from high school. Students were identified as former dual enrollment students if they were under 18 years of age during any enrollments that occurred prior to the cohort year.

Race/Ethnicity

The race/ethnicity categories included in this report are White Non-Hispanic, Black Non-Hispanic, Asian,

Hispanic, Two or More Races, Other Races (includes non-resident alien, American Indian/Alaskan native, Pacific Islander, native Hawaiian or other Pacific Islander) and Unknown.

In the graphs, every race/ethnicity category is represented although the marker for every category may not be visually distinguishable. This is because, in some cases, the values for 2 race/ethnicity categories are almost identical and their markers are the same shape. In these situations, one marker may be hidden behind another. This gives the appearance of a missing race/ethnicity category in the graph.
